

Energy House Comes To Arlington Energy House Six

Education & Demonstration Showcase

“Open House Event”

Sat & Sun April 27th & 28th

11 to 5 PM Each Day

2617 N Nottingham Street, Arlington, Va. 22207

The Energy House partnered with Arlington Designer Homes on Energy House VI which is one of the newest “green” homes in Arlington. Arlington Designer Homes is one of Arlington’s best “green” builders and was NCBA’s Custom Home Builder of the Year in 2011.

Builder — Andrew Moore of Arlington Designer Homes has combined Energy Efficiency with superior interior design. Open floor plan, 4 Bedroom, 3.5 baths, designer kitchen, private study, family room, detached garage along with live green roof, high efficiency heating and cooling, passive solar, ENERGY STAR appliances, water saving plumbing fixtures, rain gardens, and an ENERGY STAR 3.0 certifying this home as being 43% more energy efficient than a house built to code.

This home will be offered for sale on May 1st but has been offered by the builder to be an Energy House in order to promote the energy savings of his design and construction. The Energy House team, in providing a “whole house energy model” has projected the following savings to its new owner as;

Normal Code Home — Energy Costs.....\$3,900.00
 N Nottingham St Home — Energy Costs...\$2,250.00
 Yearly Energy Savings\$1,675.00
 Energy Savings Over 30 Yr. Mortgage...\$50,000.00

Energy House Founder — Charles Juris encourages everyone to visit their sixth showcase home. “You have to see this house to believe it. This is a classic example of a tremendous builder being able to not only build a very energy efficient and sustainable home but also to do it in such a way that when you are inside, it is as homey as any property in the area.”

Open House Event – This Weekend — Energy House Six will offer free guided tours of the home this coming weekend and will feature a number of local energy experts displaying their contributions to the project. Interested guests are encouraged to register in advance online at the Energy House web site, www.Energyhouse.us to reduce wait time at the tour’s entrance.

About the Energy House — Energy House is a partnership of companies in the Northern Virginia area that work together to provide residential energy upgrades through weatherization, insulation, smart technologies, solar thermal, HVAC, and geothermal. We exhibit our work at showcases that are held throughout the year. The goal of each showcase is to educate homeowners and help them visualize how these innovative, energy efficient systems and materials functions.

Energy House Firsts —

- First brand new home being presented by the Energy House
- First green builder being featured by the Energy House
- First time the Energy House has come to Arlington
